BOTTOM EVIDENCE SUMMARY

EVIDENCE SUPPORTING THE BOTTOM

- Recovery from June 30 has reached 30.52%.
- MVRV is currently 1.47.
- CME positioning and open interest provide additional post-bottom market context.

EVIDENCE REQUIRING CAUTION

- ETF flows remain net negative.
- The recovery period is still relatively early.
- Historical recovery patterns vary substantially across cycles.

RESEARCH INTERPRETATION

The June 30 low exhibits several characteristics consistent with historical Bitcoin cycle-bottom conditions, the available evidence does not yet establish the June 30 low as a confirmed cycle bottom while the current cycle remains ongoing.
